## Period: 2018-2023

Criterion 7	Key Indicator: 7.1
Institutional values and Best Practices	Institutional values and social responsibilities
Metric Number: <b>7.1.2</b>	The Institution has facilities and initiatives for 1. Alternate sources of energy and energy conservation measures 2. Management of the various types of degradable and nondegradable waste 3. Water conservation 4. Green campus initiatives 5. Disabled-friendly, barrier free environment

## ALTERNATE SOURCE OF ENERGY AND ENERGY CONSERVATION MEASURES

The college is committed to the use renewable energy and hence both the campuses are installed with solar-powered street lights with the assistance from Goverment Bodies.

## **Energy Conservation and Awareness Drive by Student Union**

To create awareness of energy conservation among students, the student union of Mariani College used to issue circulars to students for taking necessary measures from time to time. They are asked to power-off lights and fans while not required. (Appendices- I & II )

### **Use of LED in the College**

In order to minimize the unit of electricity consumption in college campus, LED bulbs and LED tube lights are being used and also energy efficient electronic equipment are used.

## 10. Waste Management

### Laboratory Waste Disposal

Solid wastes which are not biodegradable viz., plastic material, glassware etc are sent for re-cycling. Biodegradable wastes are dumped in to pits and when ~~dicomposed~~ are applied to plants in college campus. Organic wastes are applied into the vermicomposting pits. Liquid wastes are disposed in to pits dug out on reserved and protected area and covered by soil.

Plastic & Glassware waste are sent  
for recycling (a regular practice for  
*clean & green environemt*)

## RAIN WATER HARVESTING SYSTEM

College is equipped with a giant 3000 litre capacity reservoir to collect rain water collected from its roof tops in the new campus. As a monsoon region it is very much capable to collect water during summer season

## Other Water Management practices

To meet the basic requirement of water supply in College campus is mainly dependent on

1. Deep tube well (Submersible Pump)
2. Rainwater Harvesting System

To fulfil the need for drinking water the college is well equipped with electric water purifiers, RO filters and a dedicated drinking water facility. Drinking water of both the campuses are analyzed regularly in Government Laboratory of Public Health Engineering Department, Jorhat Division, Govt. of Assam.

**Old Campus** – the water analysis report are available in Appendices III & IV.

**New Campus** – the water analysis report are available in Appendices V & VI.

## GREEN CAMPUS INITIATIVES OF THE COLLEGE

### 2.1 Environmental policy of the college

Mariani College is situated in the historic Jorhat district of Assam is a pioneer institute of higher education of the locality. And as an environment-conscious college, every stakeholder of the college performs green practice.

Environmental policy of the college as follows:

1. To create awareness among students and local community regarding the importance of a green, clean and sustainable environment.
2. To plant and look after more and more trees.
3. To make pollution and plastic-free campus.
4. To utilize rainwater with the help of a rainwater harvesting system.
5. To minimize the use of paper by using digital platforms.

## **Awareness Programme and Tree Plantation Programme**

The college has been regularly conducting programmes like tree plantation and cleanliness drives with the volunteer support of teachers, staff, students, NCC and NSS units for maintaining and protecting their environment.

### **Sustainable Green Land Use Activities:**

**Plantation Drive-** To increase the number of trees within and outside of the college campuses, plantation drives are being held from time to time. Particularly on the occasion National Science Day (28<sup>th</sup> February), World Environment Day (5<sup>TH</sup> June), Teachers Day (5<sup>th</sup> September), NCC Day etc.

**Vermicompost Pit**-To avoid and to minimize chemical-based fertilizer and to promote sustainable agriculture practice among students & local community, the Zoology department is running two **vermicompost** pits in the science campus. Mariani College fulfills its organic manure needs from these two pits.

**Botanical cum Herbal Garden-** To make students and community people aware of plant biodiversity, ecological & medicinal importance of plants and to conserve rare plants, a botanical garden is being established by college authority and maintained by the Botany department from 2022.
